SUMMARY

A versatile Full Stack SQA Engineer with a focus on leveraging advanced testing frameworks and tools to ensure superior software quality. Proficient in Cypress, Selenium, and Jenkins, with extensive experience in both manual and automated testing environments. Adept at integrating testing processes into CI/CD pipelines and collaborating effectively within Agile teams. Strong analytical skills, technical acumen, and a passion for innovation drive the delivery of exceptional software solutions.

SKILL

Programming	Java, Python, Javascript, C.
Frameworks	Cypress, Selenium, Robot, Postman, Jmeter, Matplotlib, Scikit-learn.
Databases	MySQL, PostgreSQL.
Developer Tools	IntelliJ Idea, Visual Studio Code, Git.
Manual Testing	Sanity Testing, Regression Testing, Release Testing, API Testing.
Project Management Tools	JIRA, Azure Boards, Bugzilla, Trello.
Others	Excel, LaTeX.

EXPERIENCE

SQA Engineer, Apple Gadgets

December 2024 - Present

Experienced SQA Engineer with a strong background in testing ERP systems, mobile applications, and web platforms. Skilled in defect tracking, test case development, and automation using Cypress, with experience in conducting load testing using JMeter. Adept at collaborating with developers and stakeholders to deliver high-quality software solutions.

- Tested the company's ERP mobile app and POS website for functionality, usability, and performance.
- Conducted functional, regression, and end-to-end testing to ensure seamless application operation.
- Identified and tracked defects using JIRA, collaborating with developers for swift resolution.
- Automated test cases using Cypress to enhance testing efficiency and accuracy.
- Performed load testing with JMeter to evaluate application scalability and reliability.

Jr. SQA Engineer, QUALITY UP SERVICE(QUPS)

March 2023 - November 2024

1. Company Role-Based Management ERP

Contributed to the development and testing of two apps and two websites for Wholesale and Retail buyers within a Business Management ERP. Responsibilities included web and app testing, release testing, bug identification and tracking using JIRA, collaboration with developers on error resolution, API testing, and strategic involvement in business plan design and execution with top management.

- Executed software quality testing for the role-based management system.
- Collaborated with developers to identify, document, and fix software defects.
- Validated role-based access controls through rigorous testing. Strengthened
- system security by ensuring proper access controls.
- Developed and automated test cases using Cypress.

2. Business Management ERP with HISHABEE LIMITED

Played a key role in the development and testing of two applications and two websites for Wholesale and Retail buyers within a Business Management ERP. Responsibilities included testing web and mobile applications, performing release testing, identifying and tracking bugs using JIRA, collaborating with developers for error resolution, conducting API testing, and strategically participating in business plan design and execution with top management.

- Performed comprehensive manual testing on the Business Manager software to ensure functionality and reliability.
- Partnered with developers to identify and fix bugs.
- Guaranteed high-quality software for Bangladeshi SMBs through thorough testing.
- Evaluated user interface and usability to ensure user-friendliness.
- Documented test cases, results, and defects, providing feedback to the team.

3. Content Publishing Platform ERP

Managed SQA tasks for a UK-based ERP project serving a 100+ employee company, including error identification, JIRA management, developer collaboration, and comprehensive testing (release, functional, regression, sanity)

- Undertook quality testing for the CMS platform. Worked with developers to identify, log, and resolve software issues. Enhanced content publishing workflows through thorough testing. Crafted comprehensive test cases to ensure CMS functionality.
- Assessed user interface and usability to ensure user-friendliness.
- Recorded test outcomes and provided detailed feedback to the development team.

EDUCATION

BSc in Computer Science and Engineering	2020 - 2023
Green University Of Bangladesh	
• Major in Machine Learning. • Thesis on "An Intelligent Traffic Pattern Analysis and Optimization Using Machine Learning in SDN Enable Network Infrastructure". • CGPA-3.19 out of 4	
HSC in Science	2018 - May 2019
Bangladesh Navy College,Khulna	
GPA - 4.25 out of 5	
SSC in Science	2016-2017
Nodmulla Secondary School,Pirojpur	
GPA - 4.82 out of 5	

PROJECTS

Network TrafficFlow Analyzer	June 2023 - Aug 2023
Develop a Python-based network traffic analysis tool for comprehensive monitoring and insights into network activities, providing real-time data analysis and reporting capabilities.	
Emotion Base Music Recommendation	Mar 2023 - May 2023
Here uses machine learning and sentiment analysis techniques to recommend music playlists tailored to the user's current emotional state, providing a personalized and mood-enhancing music experience.
